

## HydrdoTilt

**5 Years**

**Domestic and homecare**

**Nursing and residential homes**

**Hospital wards**

**Hospices and respite care**

**Paediatric units and schools**

The backrest delivers pressure relief and long-term comfort by offering simple conforming support to the lower back whilst the user is sitting upright and in a tilted position.

The seat cushion uses CareFlex WaterCell Technology® and Vapour.

Wooden hand grips are solid enough to support the user as they rise to standing. Soft hand grips are an alternative option and consist of an upholstered foam pad fitted in the same position.

Reflexions Foam® is incorporated in the Legrests to provide pressure relief for the legs. It allows the sitting position to be adjusted throughout the day for different activities.

2 Braked Castors and 2 Swivel Castors. The castors have sealed bearing hubs for enhanced durability and smoother manoeuvrability. The two rear castors have a full brake to stop rolling. With the brakes applied, the user can confidently transfer from the chair without fear of the chair moving.

The flip-up angle adjustable footplate accommodates fixed angles of plantarflexion at the ankle and provides a more restful ankle position whilst supporting the foot.

The leg rest now has a 25° negative angle to facilitate standing. It also offers a more comfortable seating position for clients with tight hamstrings. \*Medium size only at present.

**Client Groups**

Semi-ambulant and non-ambulant, Frail and elderly, Neurological conditions (e.g. Multiple Sclerosis, Muscular Dystrophy, Motor Neurone Disease), Cardiovascular conditions & Orthopaedic conditions
