

Smart Seat Pro

SWL: 160KG

Maximum Flexibility

For cases where posture is likely to deteriorate significantly as a result of disability or illness – where total support is required to limit deterioration and provide a functional, comfortable and energy efficient position. The ability of the user's soft tissues to handle internal and external stresses may have been compromised by their condition.

Key Features:

Adjustable head and shoulder support, Tilt-in-Space (TiS) Redistribute body weight whilst maintaining hip and knee angle, Back angle recline Offers a comfortable hip position, Removable arms Both arms are removable allowing easy access and transfer from both sides, Back height adjustment, Mild lateral supports In-built mild lateral supports – which can be used as elbow pads. Seat depth adjustment the seat depth can be easily adjusted to ensure the user's pelvis stays right back in the seat. This ensures correct pelvic alignment and prevents a tilted sacral sitting posture. Seat width adjustment, Full width, independently elevating, floating-tracking leg rest Elevates to 90° with no gap – eliminating the risk of entrapment. Channels as standard to help keep the legs in a comfortable and safe position. Slight negative angle when closed aids easy standing, Integral, stowable angle adjustable footplate Stability and sensory feedback, 4 fully braked casters the castors have sealed bearing hubs for enhanced durability and smoother manoeuvrability. Each castor has a full brake to stop rolling, Maximum Pressure Relief The seat cushion uses CareFlex WaterCell Technology® and Vapour Permeable (VP) upholstery, which work synergistically to provide continuous pressure relief, Advanced materials hard wearing and easy to clean.

Client Groups:

Scoliosis, Lordosis, Kyphosis

Semi-ambulant or non-ambulant Multiple Sclerosis, Muscular Dystrophy, Motor Neurone Disease, Cerebral Palsy (particularly young adults)

Dementia Care

Head injury and spinal cord injury

Stroke rehabilitation

Technical Specifications:		
Mini:	Internal Seat Width: 280, 330, 380 & 430mm	Max User Weight: 100Kg
Small:	Internal Seat Width: 280- 400mm	Max User Weight: 100Kg
Medium:	Internal Seat Width: 380-500mm	Max User Weight: 160Kg
